# East Europe Mammals Distribution Modelling in Scope of Climate Change Prediction by 2050

*Grigoriy Kolomytsev*

*Schmalhausen Institute of Zoology NASU*

*ULRMC Biotic GIS-group*

## EEBIO area

CNTRY_NAME	rnam_cntry
Armenia	Армения
Azerbaijan	Азербайджан
Belarus	Беларусь
Georgia	Грузия
Kazakhstan	Казахстан
Kyrgyzstan	Кыргызстан
Moldova	Молдова
Russia	Россия
Tajikistan	Таджикистан
Turkmenistan	Туркменистан
Ukraine	Украина
Uzbekistan	Узбекистан

Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia (European part), Tajikistan, Turkmenistan, Ukraine, Uzbekistan

# Climate Change Data

(Sources: IMAGE-model based on OECD baseline scenario)

ULRMC biotic GIS group

biomodel

Parameters  
Annual soil water index; Annual sum of precipitation  
Growing degrees above 5 °C; Length of growing season  
Mean temp. of growing season; Temperature of coldest month

# General Linear Model (GLM) code and "R" software

## Mammals distribution trend by 2050, GLM

Species	Predicted trend by 2050, GLM
Brown bear ( <i>Ursus arctos</i> )	NE,SE
European elk ( <i>Alces alces</i> )	N
Blue Hare ( <i>Lepus timidus</i> )	NE
Jackal ( <i>Canis aureus</i> )	no changes
Wild Boar ( <i>Sus scrofa</i> )	NE,SE
European polecat ( <i>Mustela putorius</i> )	N, NE
Lesser noctule ( <i>Nyctalus leisleri</i> )	N, decreasing locally
European Rabbit ( <i>Oryctolagus cuniculus</i> )	NW-SE
Marbled Polecat ( <i>Vormela peregusna</i> )	NW
Steppe Polecat ( <i>Mustela eversmanni</i> )	N-NW
Red Squirrel ( <i>Sciurus vulgaris</i> )	NE
Great Jerboa ( <i>Allactaga major</i> )	NW, NWW
Little Ground Squirrel ( <i>Spermophilus pygmaeus</i> )	NW, NWW
Lynx ( <i>Lynx lynx</i> )	NE
Wild Cat ( <i>Felis silvestris</i> )	decreasing locally

**biomodel**

**13% - species loss, 4% - species gain and turnover, 83% - species regional relocation - due to global climate- and land use change**

**GLM-based areal trends in GLOBIO-Ukraine Region by 2050: GLM-scenarios pack, n=56**

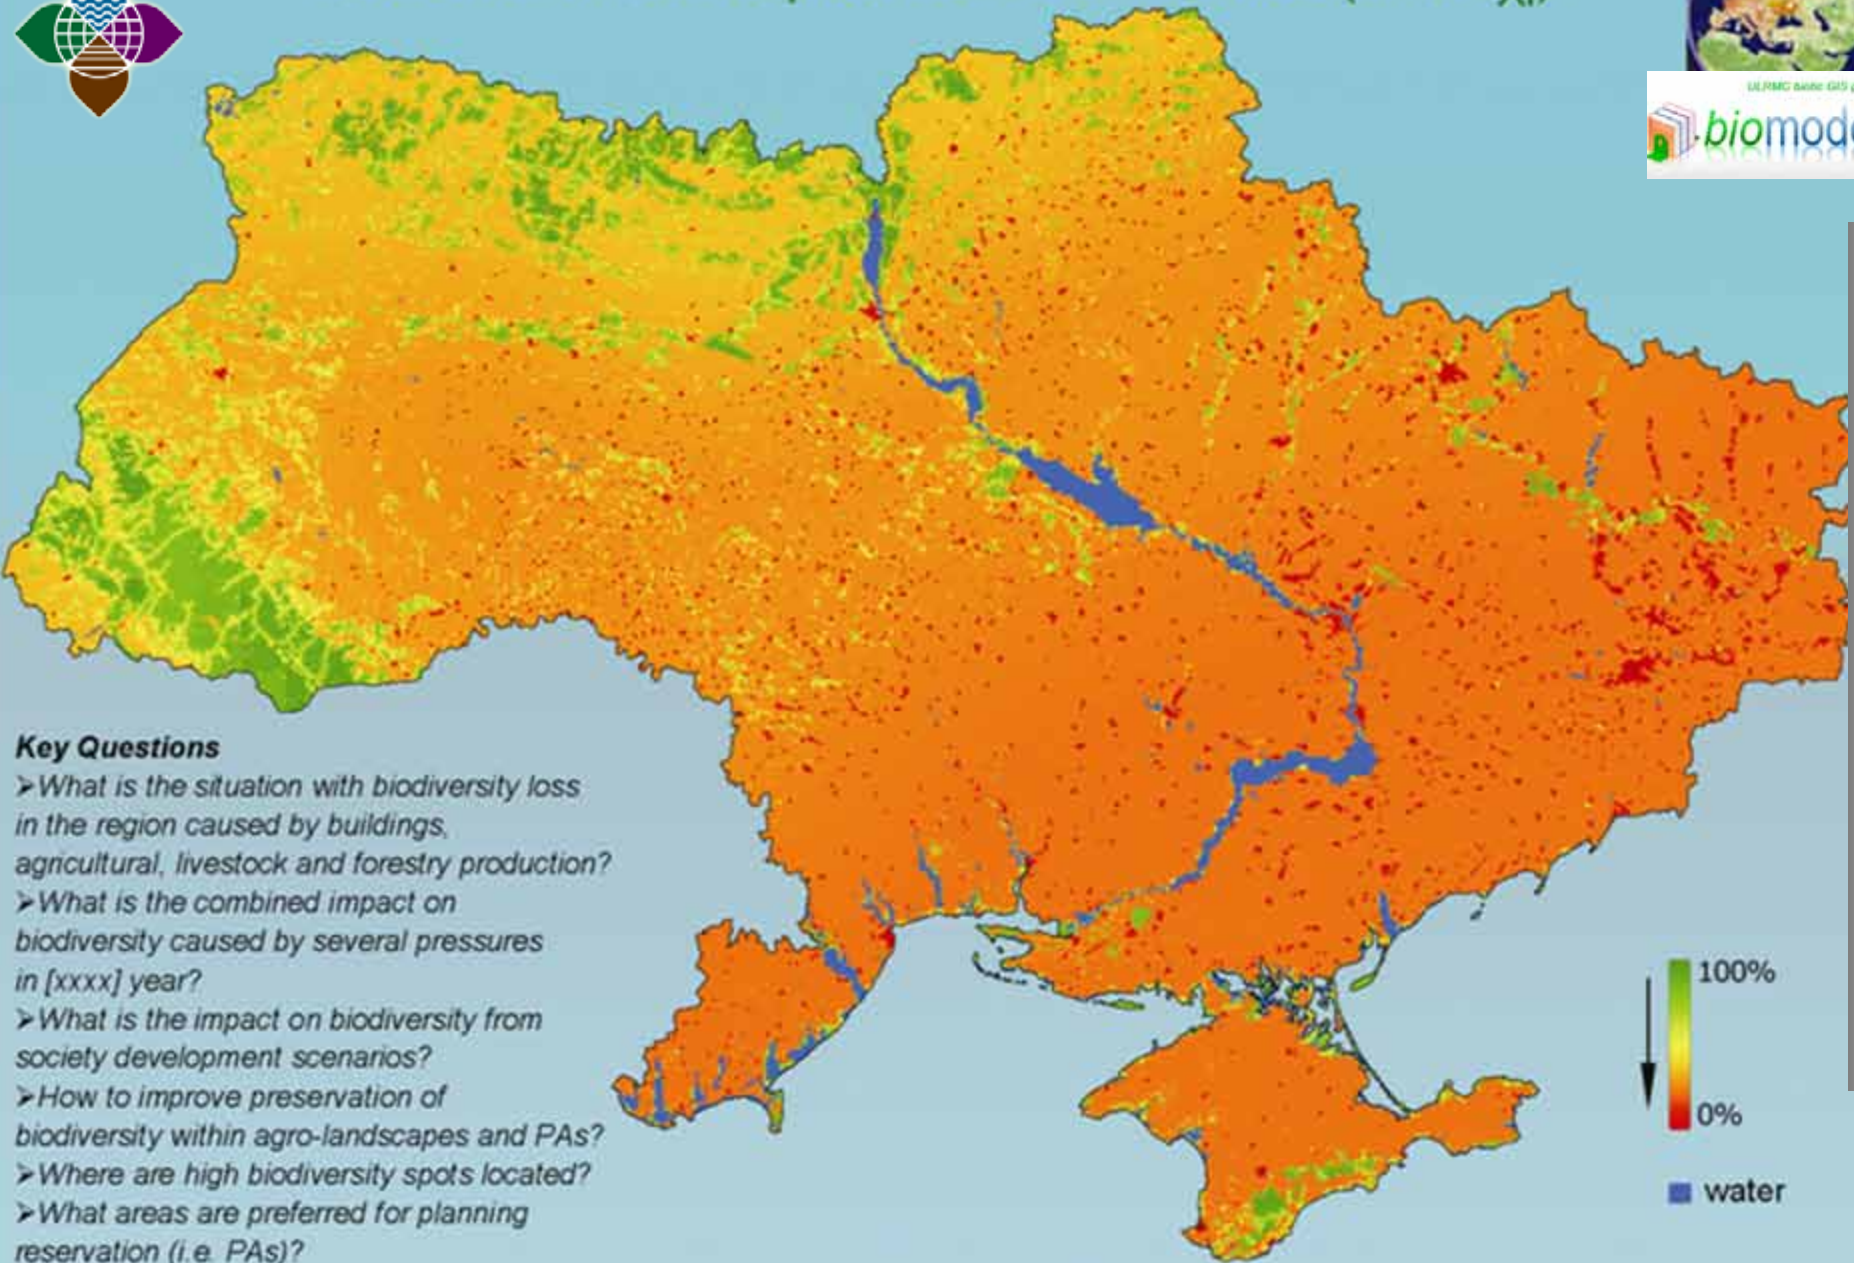

# GLOBIO-Ukraine 2050

[http://biomodel.org.ua/?page\\_id=418](http://biomodel.org.ua/?page_id=418)

The poster is produced with the assistance of ULRMC, funded by PBL Project. Authors: V. Pnydatko, G. Kalomytsev. Last update: 6 November 2008.

# Ukraine Mean Species Abundance (MSA<sub>xi</sub>)

## Key Questions

- What is the situation with biodiversity loss in the region caused by buildings, agricultural, livestock and forestry production?
- What is the combined impact on biodiversity caused by several pressures in [xxxx] year?
- What is the impact on biodiversity from society development scenarios?
- How to improve preservation of biodiversity within agro-landscapes and PAs?
- Where are high biodiversity spots located?
- What areas are preferred for planning reservation (i.e. PAs)?
